Assunto:	Connectivity Check Between GRC and S/4HANA

Hello Marcelo.

We have converted ECC to S/4HANA FPS01 for 1st integration test and you can access now.
Even though GRC integration test will be started from June, but I would like to check the connectivity between GSC and S/4HANA.

Could you please check if GRC and interface with S/4HANA with below information?

Firewall setting had been done as below :

Source	Destination	Service			Contents
10.47.128.230	10.248.202.10	3270	permit	최대	
10.47.128.230	10.248.202.10	3370	permit	최대	
10.47.128.230	10.248.202.10	3671	permit	최대	BGQ -> GT1
10.47.128.230	10.248.202.10	3971	permit	최대	
10.47.128.230	10.248.202.10	8070	permit	최대	
10.248.202.10	10.47.128.230	3202	permit	최대	
10.248.202.10	10.47.128.230	3302	permit	최대	
10.248.202.10	10.47.128.230	3602	permit	최대	GT1 -> BGQ
10.248.202.10	10.47.128.230	3902	permit	최대	
10.248.202.10	10.47.128.230	8000	permit	최대	

The S/4hana test information: SID<GT1>

Connection Type:	Custom Application Server

System Connection Parameters

Description:	S4HANA_1st test server
Application Server:	10.248.202.10
Instance Number:	70
System ID:	GT1
SAProuter String:	

Please let me know if you need further help with the configuration.

Thanks.
