FIREEYE **HELIX CONNECT**

AWS GuardDuty
Amazon, Inc.

Installation

1 - Choose Account

- This integration will forward AWS GuardDuty events from the desginated AWS account to FireEye Helix for audit and detection capabilities. To get started:
- 1. Ensure that the correct Helix instance is selected in the drop-down.
- Log into your AWS account (https://console.aws.amazon.com) and find your account ID.
- Enter in the account ID below and an AWS region in which to start below.
- Click **Submit and Verify**, which will generate a Cloudformation template for you. Run this in each region from which you wish to send GuardDuty events into Helix.

Inputs

- AWS region name   *AWS region name containing the CloudTrail bucket, e.g. us-west-2*
- AWS account ID to monitor   *AWS account ID, e.g. 012345678*

2 - Verify Integration
